CHERRY WAX

DESCRIPTION:

Cherry Wax is a super high gloss wax/floor polish designed for many different maintenance profiles including frequent high speed burnishing. The flexibility in maintenance procedures is unsurpassed.

Cherry Wax saves you money by saving labor costs while giving a great appearance and having great performance on the floor while maintenance support is more forgiving.

Cherry Wax delivers the “wet look” glossy effect that is always highly desired in a good floor wax. It shows its extreme gloss appearance on the first application and so on.

Cherry Wax offers excellent scratch, scuff, and marking resistance, while at the same time resists the embedment of dirt particles.

TECHNICAL DATA:

Solids..... 21%
Finish.....Super High Gloss
Drying Time (recoat).....30 - 45 minutes
Drying Time (traffic)..... 30 - 45 minutes
Shelf Life.....1 -2 years
Slip Resistance.....0.5 minimum (ASTM D2047)
Density.....8.54 lbs/gallon
Application Temperature..... Above 50 Degrees F

APPLICATION INSTRUCTIONS:

For First Application

1. Always be sure the substrate is completely clean, dry and free of debris prior to application.
2. Apply 3 – 4 coats using a clean mop. Applying more coats is acceptable if more gloss is desired.
3. Allow at least 30 minutes drying time in between coats. The temperature, humidity, and ventilation will affect **Cherry Wax's** drying time.

Maintenance

1. Always be sure the substrate is completely clean, dry, and free of debris. Dust mop or sweep.
2. Clean the floors surface with a clean mop or an automatic scrubber using an appropriate cleaner.
3. Burnish the floor using appropriate pads.

Recoating

1. Always be sure the substrate is completely clean, dry and free of debris. Dust mop or sweep.
2. Deep scrub the floor using an appropriate cleaner according to the directions on the bottle.
3. Apply anywhere from 1 – 3 coats using a clean mop.

FOR COMMERCIAL/INDUSTRIAL USE ONLY – Packaged in 5 gallon pails
KEEP OUT OF REACH OF CHILDREN. Refer to MSDS for safety guidelines.
